

Pedestrians

As a pedestrian you are one of the most vulnerable road users. It is important to be cognisant of your own personal safety and take steps to be as safe as possible at all times.

We wish to impart the following advice:

Be aware of your surroundings

Never cross the road between traffic

Always use a designated crossing point to cross the road

In poorly lit areas, wear high visibility clothing

Where a footpath is not present, walk against the flow of traffic. Be prepared to step in off the roadway when necessary

When crossing the road be aware that some vehicles such as trucks and buses have restricted views

Together we can reduce serious and fatal road traffic collisions.
